Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I want my credit card application to be approved quickly. • I don't understand why applications get rejected. • I hope the bank considers my financial profile fairly.	THINKS • Am I eligible for this credit card? • Will my income and credit score be enough? • I want a quick and transparent decision.
PERSONA NAME <i>Customer</i>	
DOES • Fills out the online credit card application. • Provides personal and financial information. • Waits for the approval or rejection result.	FEELS • Worried about rejection. • Confused by complex eligibility criteria. • Happy and confident if the application is approved.
