

Code-Layout, Readability and Reusability

Date	15 March 2024
Team ID	XXXXXX
Project Name	Credit Card Fraud Detection using Machine Learning
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the Credit Card Fraud Detection project in terms of structure, readability and reusability. The project follows modular design, meaningful naming conventions, comments and reusable machine learning components, making it maintainable and extensible.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes/No/Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Coding standards followed
2	Proper File Structure	Files and folders logically organized	Yes	Well organized
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Readable
4	Function / Method Names	Functions are descriptively named	Yes	Maintainable
5	Code Comments	Inline and block comments explain logic	Yes	Documented
6	Modular Design	Code split into reusable modules	Yes	Reusable
7	No Redundant Code	Duplicate or unused code removed	Yes	Optimized
8	Error Handling	Exceptions handled gracefully	Yes	Robust

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High/Medium/Low)
1	Data Loading Module	Python, Pandas	Dataset Import	High
2	Preprocessing Module	Python, Pandas, NumPy	Data Cleaning	High
3	Visualization Module	Matplotlib	EDA	High
4	Model Training Module	Scikit-learn	Model Training	High
5	Evaluation Module	Scikit-learn	Performance Metrics	High
