

## Project Demo Planning

|               |                                 |
|---------------|---------------------------------|
| Date          | 28 June 2026                    |
| Team ID       | XXXXXX                          |
| Project Name  | Credit card approval Prediction |
| Maximum Marks | 5 Marks                         |

### Project Demo Planning

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

| S.No | Demo Section        | Description                                                               | Duration | Responsible Member |
|------|---------------------|---------------------------------------------------------------------------|----------|--------------------|
| 1    | Introduction        | Problem statement, objectives and team introduction                       | 3 min    | Vikas Kongara      |
| 2    | Dataset & ML Models | Data set preprocessing, logistic Regression ,decision tree ,Random forest | 4min     | Karakala Likitha   |
| 3    | Live Web Demo       | Flask application with real-time prediction                               | 5 min    | Kute Vinay Kumar   |
| 4    | Cloud Deployment    | IBM Watson ML deployment and prediction                                   | 3 min    | Raavi Divya        |
| 5    | System Architecture | Architecture and workflow explanation                                     | 2 min    | Kadiyala Goutam    |
| 6    | Q&A                 | Answer evaluator questions                                                | 1 min    | All Members        |

### Demo Flow Summary

| Step | Activity                         | Notes                                                                 |
|------|----------------------------------|-----------------------------------------------------------------------|
| 1    | Introduction & Problem Statement | Explain banking approval challenges and project goals                 |
| 2    | Solution Overview                | Describe preprocessing, ML models, Flask UI and IBM Watson deployment |
| 3    | Live Feature Demonstration       | Predict approval using sample applicant data                          |
| 4    | Q&A Session                      | Discuss model accuracy, deployment and future improvements            |
